Dario Vélez

Software Engineer, JS+NodeJs+React Full Stack developer
Buenos Aires, Buenos Aires Province, Argentina

Summary

I am a seasoned fullstack software developer and software engineer
with a rich and diverse background in creating innovative solutions
across various projects. With a strong foundation in both frontend
and backend development, I have successfully contributed to
numerous projects, showcasing my proficiency in technologies such
as HTML, CSS, JavaScript, and various frontend frameworks. On
the backend, I have expertise in server-side languages, databases,
and server deployment. Additionally, my experience extends to
mobile application development, where I have leveraged my skills
to create robust and user-friendly applications. I have a proven track
record of delivering high-quality software solutions, collaborating
with cross-functional teams, and adapting to the dynamic landscape
of technology. My commitment to staying updated with the latest
industry trends and my problem-solving mindset make me a valuable
asset in developing and optimizing software solutions to meet the
ever-evolving needs of users and businesses.

Frontend:
- Javascript,
- Typescript,
- NodeJS,
- React,
- React Native,
- TDD con Jest y Enzyme.

Backend
- NodeJs.
- Serverless Framework
- PostgresSQL, MySQL, MongoDB
- AWS AUth services

CI :
- Jenkins,
- AWS CLoud Services

serverless:
- AWS,
- Google,
- Firebase.

———
